PROFILE

Enthusiastic and passionate to build interactive solutions to improve user experience in application programming. I proactively challenge my creativity to learn and develop groundbreaking applications. I have the curiosity to learn new emerging technologies and converting the new to solidify my skills in programming. In the long term, machine learning and neural networks are motivation in web development as my career.

SKILLS

Ruby	HTML5	ReactJS
Ruby on rails	CSS3	Java
Javascript	NodeJS	Ajax
PostgreSQL	Watir and Cucumber	Git and Github

PROJECTS TOUCH

Ruby on Rails, Javascript and CSS

Communication is the main reason we have videos and music application for artists to relay their artistry and message to everyone. Users can listen to music and give a rating and comment on the track. Each user can view all tracks, artists can delete or add new tracks.

PROJECT BOARD

Ruby on Rails, HAML, Javascript and SCSS

A web application for posting projects that a user has worked on. The user has many projects and a project has many comments through users. Used acts as votable, to allow projects to be voted on or liked. Devise for user authentication and authorisation.
